Continuation of 2. NOTE: the new limitation in claim 1 reciting "a gasket coupled to the distal end of said sleeve" requires further consideration. Additionally, in claim 8, the new limitation that the "sleeve is slidably coupled with the outer surface of said elongated tube" requires further consideration.

Continuation of 10. Other: Regarding the drawing objection, the specification states that Figs. 1 and 2 are the same embodiment, just different views. Therefore, the claims can only show one of the two different claimed species. According to the Examiner, the figures appear to show an angular portion. Are these obvious variants? If so, the Applicant must clearly admit this on the record.
